ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: INSECT TRAP

(57) Abstract: An insect trap comprises an outer casing
(3) having an opening, a light source (2), and a cover (1c)
substantially closing the opening of the casing. The cover
(1c) tapers from a first cross-section which matches that
of the opening of the outer casing to a second cross-sec-
tion which defines an insect entry port (4) leading into a
chamber (5). The cover (1c) is made of a material that is
substantially transparent to light having the frequency of
the light source (2), and the light source is positioned so
as to be visible from the open end of the outer casing (3)
through the cover.
